

Variable Material Issuing (VMI) sub-module to our ShopFloor for MS Dynamics NAV

## Handle project based material consumption without a pre-defined bill of material – maintain and adjust your existing bill of material according to the actual usage

### Flexible Material Posting is Necessary in Project Based Manufacturing

This sub-module to our ShopFloor operator terminal enables you to handle project based material consumption without a pre-defined bill of material. You can maintain and adjust your existing bill of material according to actual usage.

## Features and Main Functionalities

- Flexible issuing of materials during the production process via the operator's ShopFloor terminal
- In combination with NAVEKSA BSL module, batch, serial and lot numbers can be allocated flexibly

### Compatible with current versions of NAVEKSA ShopFloor for MS Dynamics NAV

This module can be implemented in few hours (plug and play). The module does not make any changes to a standard MS Dynamics NAV solution.
